

PRESENTED BY:

Software designed specifically for Mayor's Courts. The Baldwin Group offers two versions of court management software to meet the varying needs of a Mayor's Court. The 'Full' version is robust and includes many features. The 'Lite' version is just enough of what a smaller court needs without any costly extras. Several add-on modules can be purchased for use with both versions. (See reverse for more info)

Some of the modules listed below are included in both products. Though an electronic interface isn't included in the 'Lite' version for several modules, the services of those companies can still be used by clients having the 'Lite' version of Mayor's Court.

#### **BMV FTP REPORTING (included in both versions)**

Report all convictions, points, suspensions, license forfeitures, warrant blocks, and registration blocks electronically.

#### **SUPREME COURT QUARTERLY REPORTING included in both versions)**

The Mayor's Court software generates the Supreme Court Quarterly Caseload Report for the clerk. The report can be printed and submitted electronically.

#### **COLLECTIONS—Capital Recovery Systems (full version only)**

Electronically upload cases eligible for collections to Capital Recovery Systems. All fees are paid by the defendant with no additional cost to the court.

#### **COLLECTIONS—Ohio Attorney General (full version only)**

Electronically upload cases eligible for collections to the Ohio Attorney General for collections. All fees are paid by the defendant with no additional cost to the court.

#### **ONLINE DIVERSION INTERFACE (full version only)**

Require defendants to take an online diversion program through the American Online Learning Center. Information is entered on the Mayor's Court probation screen. Automatic uploads of information mark conditions as complete in Mayor's Court.

#### **ONLINE DIVERSION INTERFACE (full version only)**

Require defendants to take an online diversion program through the American Online Learning Center. Information is entered on the Mayor's Court probation screen. Automatic uploads of information mark conditions as complete in Mayor's Court.

### MICROSOFT® WORD TEMPLATE

Create your own letter templates in Microsoft® Word and print them directly from Case Maintenance complete with Defendant information.

Microsoft is a trademark of the Microsoft group of companies

### ONLINE DOCKETING & PAYMENTS

Upload case information to a website hosted by BGI. Defendants access their case and make a payment right from the website using one of the third party payment processors BGI interfaces with. Payments are posted into Mayor's Court, receipts generated, and the case closed automatically.

### BCI DISPOSITION REPORTING

Using FTPS the BCI Disposition Reporting Module uploads court disposition information to BCI eliminating the need to manually fill out disposition cards.

### POLICE RECORDS MANAGEMENT INTERFACE

Eliminate double-entry. Import tickets from your Police Records Management System directly into Mayor's Court automatically creating the cases. Non-web-based for third party vendors not participating in NIEM

### E-CITATION INTERFACE

Eliminate double-entry. Cloud-based interface with several police RMS providers including OLEIS/SOLVE and OHLEG and others using NIEM. Module includes citation images viewable right from the case in Mayor's Court.

### CARBONITE CLOUD-BASED BACKUP SERVICE

Online backup service. Several storage capacity options available—backup one computer, several computers, or an entire server.

### GO PAPERLESS!!

BGI has partnered with GBS to offer FileBound to our Mayor's Court clients. Scan important case documents and link them directly to a case. All documents can be viewed directly from the case.

**Did you know? The Baldwin Group, Inc also offers the following:**

### Parking Ticket Tracking System

Track and manage parking tickets. Print bills. Issue DETER blocks electronically. An online payment add-on module is also available.

### Municipal Income Tax Solutions

Software to manage in-house income tax collections. Available modules include—eFile/ePay, ACH, Microsoft Word Integration, e-Signatures, Bar Code Scanning, Document Imaging, Document Transfer, Deposit Breakdown
